

Bioelectromagnetics is a peer-reviewed, internationally circulated scientific journal that specializes in biological, chemical, biophysical, epidemiological and clinical research on the interaction of biological systems with electric, magnetic, and electromagnetic fields with frequencies from zero (DC) to terahertz. It publishes experimental and theoretical papers as well as reviews that offer novel insights into or criticism of concepts of field-organism interactions. The journal also welcomes papers on mechanical or other physical factors that may lead to better understanding of bioelectromagnetic interactions.

REASONS TO SUBMIT YOUR WORK TO *BIOELECTROMAGNETICS*:

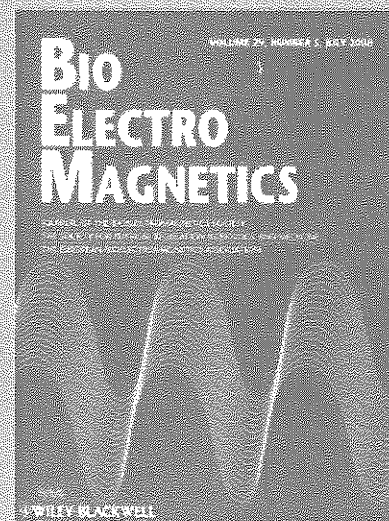

- ✓ The opportunity to be part of a publication with a uniquely targeted focus on bioelectromagnetics
- ✓ An esteemed editorial board made up of the leaders in the field
- ✓ Funded Open Access (OnlineOpen) options for authors
- ✓ The opportunity to be considered for a new annual best paper award and new annual most influential *Bioelectromagnetics* journal paper by citation award.

Submit your research at: <http://mc.manuscriptcentral.com/bem>

BE AMONG THESE TOP MOST CITED ARTICLES:

- Magnetic-field-induced vertigo: A theoretical and experimental investigation; *P.M. Glover, I. Cavin, W. Qian, R. Bowtell, P.A. Gowland* (Volume 28, issue 5)
- Effects of pulsed and continuous wave 902 MHz mobile phone exposure on brain oscillatory activity during cognitive processing; *Christina M. Krause, Mirka Pesonen, Christian Haarala Björnberg, Heikki Hämäläinen* (Volume 28, Issue 4)
- Feasibility of future epidemiological studies on possible health effects of mobile phone base stations; *Georg Neubauer, Maria Feychting, Yngve Hamnerius, Leeka Kheifets, Niels Kuster, Ignacio Ruiz, Joachim Schüz, Richard Überbacher, Joe Wiart, Martin Rössli* (Volume 28, Issue 3)
- No apoptosis is induced in rat cortical neurons exposed to GSM phone fields; *Vanessa Joubert, Philippe Leveque, Marylene Cueille, Sylvie Bourthoumieu, Catherine Yardin* (Volume 28, Issue 2)
- Exposure to ELF magnetic and ELF-modulated radiofrequency fields: The time course of physiological and cognitive effects observed in recent studies; *C.M. Cook, D.M. Saucier, A.W. Thomas, F.S. Prato* (Volume 27, Issue 8)

Bioelectromagnetics Society Members can opt to subscribe to the journal at a special rate. For more information, visit www.bioelectromagnetics.org
